

GREEN CITY- Smart Waste Collection, Tracking and Management System

Resident Mobile Application – Registration Guidelines

1. Purpose

This guide explains how a new resident can create an account in the Green City mobile application. Registration allows residents to provide their basic contact and residential information and select their home location so that waste collection requests can be managed through the system.

2. Information Required for Registration

Field	What to Enter	Guideline
Name	Resident's full name	Enter your name correctly.
Email	Valid email address	Use an email address that you can access.
Password	A secure password	Create a password that you can remember and keep confidential.
Mobile No	Active mobile number	Enter a valid number that can be used for communication.
Home Address	Residential address	Enter your current home/residential address.
Select Location	Home location on the map	Select your residential location accurately.

3. Step-by-Step Registration

Step 1 – Open Registration

Open the Green City mobile application and go to the Create Account / Registration screen.

Step 2 – Enter Name

Enter your full name in the Name field.

Step 3 – Enter Email

Provide a valid email address.

Step 4 – Create Password

Enter a secure password for your account.

Step 5 – Enter Mobile Number

Enter your active mobile number.

Step 6 – Enter Home Address

Provide your residential/home address.

Step 7 – Select Location

Tap Select Location and choose your residential location on the map.

Step 8 – Verify Details

Check that all entered information and the selected location are correct.

Step 9 – Register

Tap the Register button to submit the registration details.

Step 10 – Login

After successful registration, use the registered account to log in to the system.

4. Important Guidelines

- Use accurate personal and contact information.
- Use an email address and mobile number that you can access.
- Keep your password confidential and do not share it with others.
- Enter the correct home address.
- Select the residential location accurately on the map because the location is important for waste collection management.
- Review all information before selecting Register.

5. Registration Screen – Field Overview

- Name – Identifies the resident.
- Email – Used as the resident's email/contact information.
- Password – Used to secure the account.
- Mobile No – Provides a contact number.
- Home Address – Stores the resident's residential address.
- Select Location – Allows the resident to identify the home location on the map.
- Register – Submits the completed registration form.

6. Successful Registration

Once the registration information is accepted by the system, the resident can use the created account to access the application and its available waste collection services.

7. Common Mistakes to Avoid

- Leaving required fields empty.
- Entering an invalid email address.
- Entering an incorrect mobile number.
- Using an incorrect home address.
- Selecting an inaccurate map location.
- Sharing the account password with another person.
